

# the creator's manifesto

We were put on this earth to create  
something beautiful.

Powerful.

Necessary.

The call is loud.

The noise of hustler is distracting.

We are true artisans.

Carefully carving our visions into reality

We choose the SLOW Track

Because we know nothing great is  
instant.

We are our only competition.

We don't chase 6 or 7 figures.

We don't do it "for the gram"

We do it because our souls compel us...

in a way that's impossible to ignore.

We choose to become Masterful.

We choose to live our purpose.

To create work we are proud of.

To design a life better than our dreams.

Slowly, with intention.

We are paid for our Genius not our  
tactics.

We are the Tesla not the Theranos.

We are Idea Alchemists.
